Xcelerate: BC Foundation Project Add-Ons

**Modular.
Scalable.
Made for You.**

Xcelerate: BC Foundation includes Business Central's Core Finance functionality. Looking for more to help manage your projects?

Our modular approach enables you to add extra features as needed. Empower your teams to plan, execute, and track projects— from setup through billing and reporting, with precision that leads to improved profitability.

Basic Projects | $4500

Set up and manage projects, track costs and progress, and invoice with ease.

Set Up and Organize Projects
Create new projects using standard BC statuses and ensure every project is linked to the correct Bill-to Customer.

Build a Simple Project Structure
Add project tasks, planning lines, and (optional) budget entries.

Track Basic Project Costs & Billing
Record time, items, and expenses, bill customers, and use a standard Job Posting Group to ensure clean, consistent posting to your GL.

Use Dimensions for Better Reporting
Apply your existing default dimensions on projects and transactions to generate insights using BC reporting tools.

Power BI Project Reports | $1500

Get real-time project performance insights with visual dashboards including:

Projects Overview
Get a high-level view of your organization's projects. View key metrics and track performance across them.

Project Tasks
Break down each project and its tasks to identify how each task is performing.

Project Profitability
Analyze the profit of each job and ensure you meet targets.

Project Realization
View project completion statistics like how billing is performing against the costs.

Project Performance to Budget
Track the performance of each project and how they track toward their budget.

Project Invoiced Sales by Type or Customer
View all sales entries for projects broken down by the sales line type or the customers you sell to the most.

Project Timeline
Analyze the schedules of each project task with a Gantt chart, detailing project tasks and their durations.
