

## Implementing an agile technology solution to keep pace with growth

Today, Direct Source doesn't look anything like the cash register supplies distributor they started as over two decades ago. They now serve the hospitality and retail industries with quality breakroom, restaurant and custom solutions throughout the United States.

The need to stock supplies for national restaurant customers such as TGI Fridays and Joe's Crab Shack drove Direct Source to expand their business category by category, more than doubling in size over three years.

ENAVATE worked with Direct Source Products to implement Microsoft Dynamics AX so they had a technology solution that would keep pace with their rapid growth.
